Work Experience

Independent Full-Stack Developer | 2025 - Present

Platform: Cyber

- Designed and developed a full-stack web application using React.js, TypeScript and MongoDB.
- Built responsive and user-friendly interfaces with a focus on performance and scalability.
- Developed REST APIs and integrated frontend components with backend services
- Implemented authentication, authorization and secure user management features.
- Managed application state and date fetching using modern React patterns.
- Deployed and monitored services on Linux servers using PM2.
- Maintained clean code architecture and followed best practices for scalability and maintainability.

Platform: Rolex

- Developed a luxury watch platform using Next.js, TypeScript, GraphQL and MongoDB.
- Integrated GraphQL APIs using Apollo Client for efficient data fetching and state management.
- Built responsive product catalog, search, filtering and product detail pages.
- Worked with MongoDB data models and backend API integrations.
- Designed and managed multi-container deployments using Docker Compose .
- Automated application deployment and environment configuration using Docker.

Education

Devex Academy - Full-Stack Development
(MERN & NestJS)

Jan. 2025 - May. 2026
